Total amount of acquisition of fixed tangible and intangible assets	3 438	1 878	3 505

Major investments in progress

The investments in the two factories of Tchaikapharma High Quality Medicines Inc. are the system of serialization and tamper evidence with which we meet the requirements of the European **Directive 2011/62/EU**. From 9.02.2019 every package of a medicinal product can be marketed within the EU with unique coding and tamper evidence. The system will be implemented in cooperation with SoftGroup AD and for installation are planned 5 machines for printing and verification of 2D matrix code (with the unique code of the box) tamper evidence system in each cartoning machine, server: central and local, software for generating individual codes, storing and sending them to the European hub.

A small investment in the plant in Plovdiv is the system for optimizing the energy costs for heating and cooling of the production ventilation system.

Economic activity

The entered in the Commercial Register activity of the Company is: purchase of substances and formulations for the production and sale of pharmaceuticals in finished or

processed form, (after Marketing Authorisation); primary and secondary packaging of formulations (after Marketing Authorisation); import, export, re-export and merchandising in original or processed form; barter transactions and commissions; commercial representation of foreign and domestic individuals and legal entities at home and abroad; industrial and commercial management; consulting, marketing, brokerage, leasing, licensing, entrepreneurship, transport and shipping, research and development activities.

Currently the main scope of activity of the Company can be summarized as follows:

- Production
- Packaging (primary and secondary)
- Marketing and promotion of medicines
- Research and Development

In the second quarter of 2018 Tchaikapharma continued to be one of the leading pharmaceutical companies in Bulgaria, which continued to add new products to its diverse portfolio. The company received a Marketing Authorization for the medicinal product Pizona Combi 15 mg/850 mg film-coated tablets, which controls the level of blood sugar in type 2 diabetes.

Audits of new dossiers have been carried out, which will be submitted for registration both in Europe and only for the Bulgarian market.

Tchaikapharma High Quality Medicines Inc. has entered the market in Kosovo where five new products enrich the company's portfolio there, which will be from the cephalosporin group.

Tchaikapharma High Quality Medicines Inc. has continuously maintained its production facilities in accordance with the contemporary European requirements for Good Manufacturing Practice of Medicines. At present, more than 150 medicinal products are being produced in the company's plants. The premises and equipment of the plant are in full compliance with the European requirements for the production of sterile medicinal products.

Tchaikapharma High Quality Medicines Inc., as a high-quality manufacturer of medicinal products, began to produce its own dossiers of medicinal products. The dossier of a medicinal product with INN Irbesartan is underway. The necessary documents such as Protocol, Investigator's Brochure, Patient's Clinical Card, etc., required to obtain authorisation to conduct a second clinical trial to demonstrate the bioequivalence of a fixed combination of irbesartan/hydrochlorothiazide with the CoAprovel reference product are under preparation.

The development and validation of methods for investigation of the concentration of drug substances in human plasma is a major task of the bioanalytical laboratory. An important part of the work of the laboratory is the creation of standard operating procedures to ensure the quality of the work and the reliability of the results. Based on the quality system under construction in the bio-analytical laboratory, it will also be possible to initiate a Good laboratory practice (GLP) compliance procedure.

Review of the risk factors

- The Company's activities could be affected by any change in the regulatory requirements for the production of pharmaceutical products.
- Changes to the legislation regulating the Company's business are possible, and these can potentially increase the costs of compliance or have another effect on its operations.
- The production processes of the Company are subject to stringent requirements and approvals by regulatory authorities which may delay or interrupt the operations of the Company.
- The ability of the Company to pay dividends depends on a number of factors and there is no guarantee that in a year it will be able to pay dividends in accordance with its dividend policy.
- The Company is exposed to operational risk, which is inherent in its business activities.
- The Company is subject to multitude laws and regulations in the field of environmental protection and health and safety conditions and is exposed to potential liabilities related to the environment.
- The Company is exposed to strong competition.

The Company operates in active exchange with foreign suppliers and customers. It is therefore exposed to currency risk, mainly against the US dollar. Currency risk is related to the adverse movement in the exchange rate of the US dollar against the Bulgarian lev in future business operations, recognized foreign currency assets and liabilities. The rest of the company's operations are usually denominated in Bulgarian lev and/or in euros.
